

EE Print Pack Memory Net

SPEC SHEET

COMPOSTABLE

Soft, adjustable extruded net · compostable.

Extruded net that gives and then holds, so it settles around whatever it carries instead of forcing the shape. Soft enough for produce that bruises, and compostable.

RUNS ON

Soft, adjustable extruded net, supplied to the count and opening your programme runs.

SPECIFICATIONS

Construction	Extruded net, soft and adjustable
End of life	Compostable
Properties	High breathability, product visibility
Typical uses	Garlic, limes, shallots, tangerines, figs, mangos

WORKS GREAT FOR

Garlic

Garlic is sold in small counts and bought on appearance. A soft net holds the bulbs without pressing into them, and the pack still shows what is inside.

Limes

Small-count lime packs for retail, where the net has to hold three or four pieces without marking the skin.

Shallots

The same case as garlic: small, delicate, sold by count, and judged on how the skin looks in the pack.

Tangerines

Easy-peel citrus in count packs, where a firm net leaves a grid pattern on soft skin and a memory net does not.

Figs and mango

Fruit that bruises if the pack does not give. The net adjusts as the fruit softens instead of holding a fixed shape against it.
