

EE Print Pack Vexar Mesh

SPEC SHEET

MESH & NETTING

Extruded net · tough, breathable, and the product stays visible.

Extruded net rather than knitted. It holds its shape, breathes, and lets the product show through, which is why it turns up as much in promotional packs and toys as it does in produce.

RUNS ON

Extruded net construction, supplied to the opening and length your operation runs.

SPECIFICATIONS

Construction	Extruded net
Properties	High breathability, product visibility
Typical uses	Avocados, citrus, onions, promo packs, toys

WORKS GREAT FOR

Avocado

Counts sold in a net rather than a bag, where the fruit has to be visible and the pack has to hold its shape on a display.

Onion

The classic extruded-net application. Full air movement around the bulb and the product visible through the net at every angle.

Citrus

Oranges and mandarins in count packs. Net colour is chosen to make the fruit read brighter, which is why citrus so often ships in orange and red extruded net.

Promotional packs and toys

Outside produce entirely: anything sold as a visible multi-pack where the net is doing the work a printed box would otherwise do.
